JAVA DEVELOPER

SUMMARY OF QUALIFICATIONS

- Experienced in developing professional solutions and designing/implementing projects based on Java.
- Proven ability to work in a team; directs responsibility in an independent and structured way of working; operational readiness and reliability; resolution oriented; quality awareness.
- Seasoned software engineer that thrives in working with a team of engineers that are technically-inclined and supportive.
- Able to apply academic knowledge of software development concepts and processes in a professional environment with the support of more experienced engineers in the team.
- Expert in building software for a variety of purposes including live production systems and automation of engineering processes such as test and release.
- Able to work as part of a self-organizing team to develop new features and functionality for high volume, large scale betting websites.
- Practices test-driven development to produce robust, clear, polished, code to a high standard of quality and creates design solutions that are modular, scalable, extendable and portable.
- Client-focused; works with diverse customers to extract and understand requirements using BDD.
- Well-developed communication, written and spoke, along with understanding of client-server architecture and database design.

TECHNICAL COMPETENCY

- Expert in Java (Java8) and in high performance and reactive Websites Extensive knowledge of software design patterns and methodologies including experience with web-based development and object-oriented design.
- Strong understanding of web application stack (HTTP, REST APIs, JSON).
- Strong fundamental programming skills (data structures, algorithms, design patterns).
- Familiarity developing on Unix/Linux.
- Experience with LAMP (Linux, Apache, MySQL, PHP) website design.
- Web development skills HTML, HTML5 and CSS.
- Knowledge of Agile, Scrum, BDD, TDD and/or CI.
- Continuous Integration and Deployment Play Framework, Spring or Ninject Experience with some of the following Systems (ElasticSerach, MongoDB, Docker, MessageQueues) Micro Service Architectures Optional Experience with Functional Programming in any Language (Java8/Scala).
- Java, JSF, JPA, Spring MVC, Hibernate, Primefaces.
- C# MVC, ASP.net, VB/VBA, ASP.
- PHP, CakePHP, Laravel, Ruby on Rails, HTML, CSS, JavaScript, JQuery, Angular.
- SQL Server, Oracle, MySQL, PostgreSQL, PI, MongoDB.
- Windows Server 2003/2008, Active Directory, IIS, Apache, TomCat.
- Android Studio, Windows Phone.

PROFESSIONAL EXPERIENCE

Systems Analyst & Software Developer, Chemtech Servicos Feb 2014 – Apr 2016

- Worked in multidisciplinary teams on engineering projects and industrial IT solutions for industrial ventures.
- Created and customized automation industrial software using advanced development and coding complex IT solutions.
- Managed all phases of software design from coding and prototyping through system testing, integration and deployment.
- Contributed software engineering expertise in the development of products through the software lifecycle, from requirements definition through successful deployment.
- Facilitated customization of systems by encouraging software engineering team to adopt emerging standards for software application development architecture and tools.
- Led software development and management of technological issues for assigned projects, earning the highest customer satisfaction rating for all software solutions delivered.
- Implemented and maintained database SQL Server, Oracle, MySQL, PostgreSQL, PI and MongoDB.
- Developed and analyzed industrial systems on different platforms and technologies.
- Identified software requirements analysis for MES layer and interfaces.
- Implemented, planning, production, quality and shipping modules of MES and ERP solutions.
- ✓ *Developed and enhanced programs using Java, C, C# and PHP, contributing to solutions that streamlined processes, increased accuracy and lowered costs.*

Internet Network Administrator & Programmer, De A a Z Systems Jun 2010 – Dec 2010

- Developed/administered database design, maintenance and optimization; provided technical support to end-users, leveraging broad-based expertise to handle problem identification, diagnosis, resolution, and escalation via helpdesk, telephone, and remote support tool.
- Performed security administration functions for user, data, and remote access.
- Implemented and maintained Active Directory and IIS server, Firewall Linux, telecommunications based in Asterisk, computer networks, SWL server and MySQL.
- ✓ *Developed step-by-step training manuals for end-users to ensure a seamless transition following application upgrades.*
- ✓ *Spearheaded new procedures for Help Desk documentation, enabling development of a comprehensive knowledgebase of common issues and solutions to improve efficiency.*

EDUCATION

Bachelor of Information Systems Degree, University of Sao Paulo

Jul 2015

ADDITIONAL TRAINING

- Enterprise Java (framework spring MVC)
- HTML5 & CSS3
- Angular 1.5.8
- PrimeFaces & JFS
